How Revenue is Generated in F1

multi-billion dollar revenues

Jenson Button

@ProfMJElliott

martin.elliott@gosh.nhs.uk

“To understand the intensity of driving an F1 car, you have to be in it. When you're driving a 750hp machine at 200mph, **the noise and the vibrations are incredible.**

The G-force when you take big corners is like someone trying to **rip your head off.**

You hit the brakes, and it feels as if the **skin is being pulled off your body.”**

Jenson Button

HUMAN FACTORS AND CARDIAC SURGERY: A MULTICENTER STUDY

Marc R. de Leval, MD^a

Jane Carthey, PhD^a

David J. Wright, PhD^b

Vernon T. Farewell, PhD^b

James T. Reason, PhD^c

All United Kingdom pediatric cardiac
centers

Objective: To study the role of human factors on surgical outcomes, with a series of 243 arterial switch operations performed by 21 surgeons taken as a model.

Methods: The following data were collected: patient-specific and procedural variables, self-assessment questionnaires, and a written report from a human factors researcher who observed the operation. The relationship of patient-specific variables to outcomes (death and death and/or near miss) was used

“80% of what happens in a hospital is completely predictable.

We need to free the intellectual capacity of the staff to sort out the vital 20% that is unpredictable”

@ProfMJElliott

martin.elliott@gosh.nhs.uk

Real-time Adaptive & Predictive Indicator of Deterioration

Dr Heather Duncan
Professor David Lowe
Dr Peter van Manen

Supported by
wellcometrust

Proof of concept

20 Intensive Care beds

1 ambulance trolley

Young Lives
Health Foundation funded
~3000 patients recruited
Some cardiac arrests predictable
Some unplanned extubation predictable
Trends needed in PICU
Smart alarms can work

4 cardiac beds

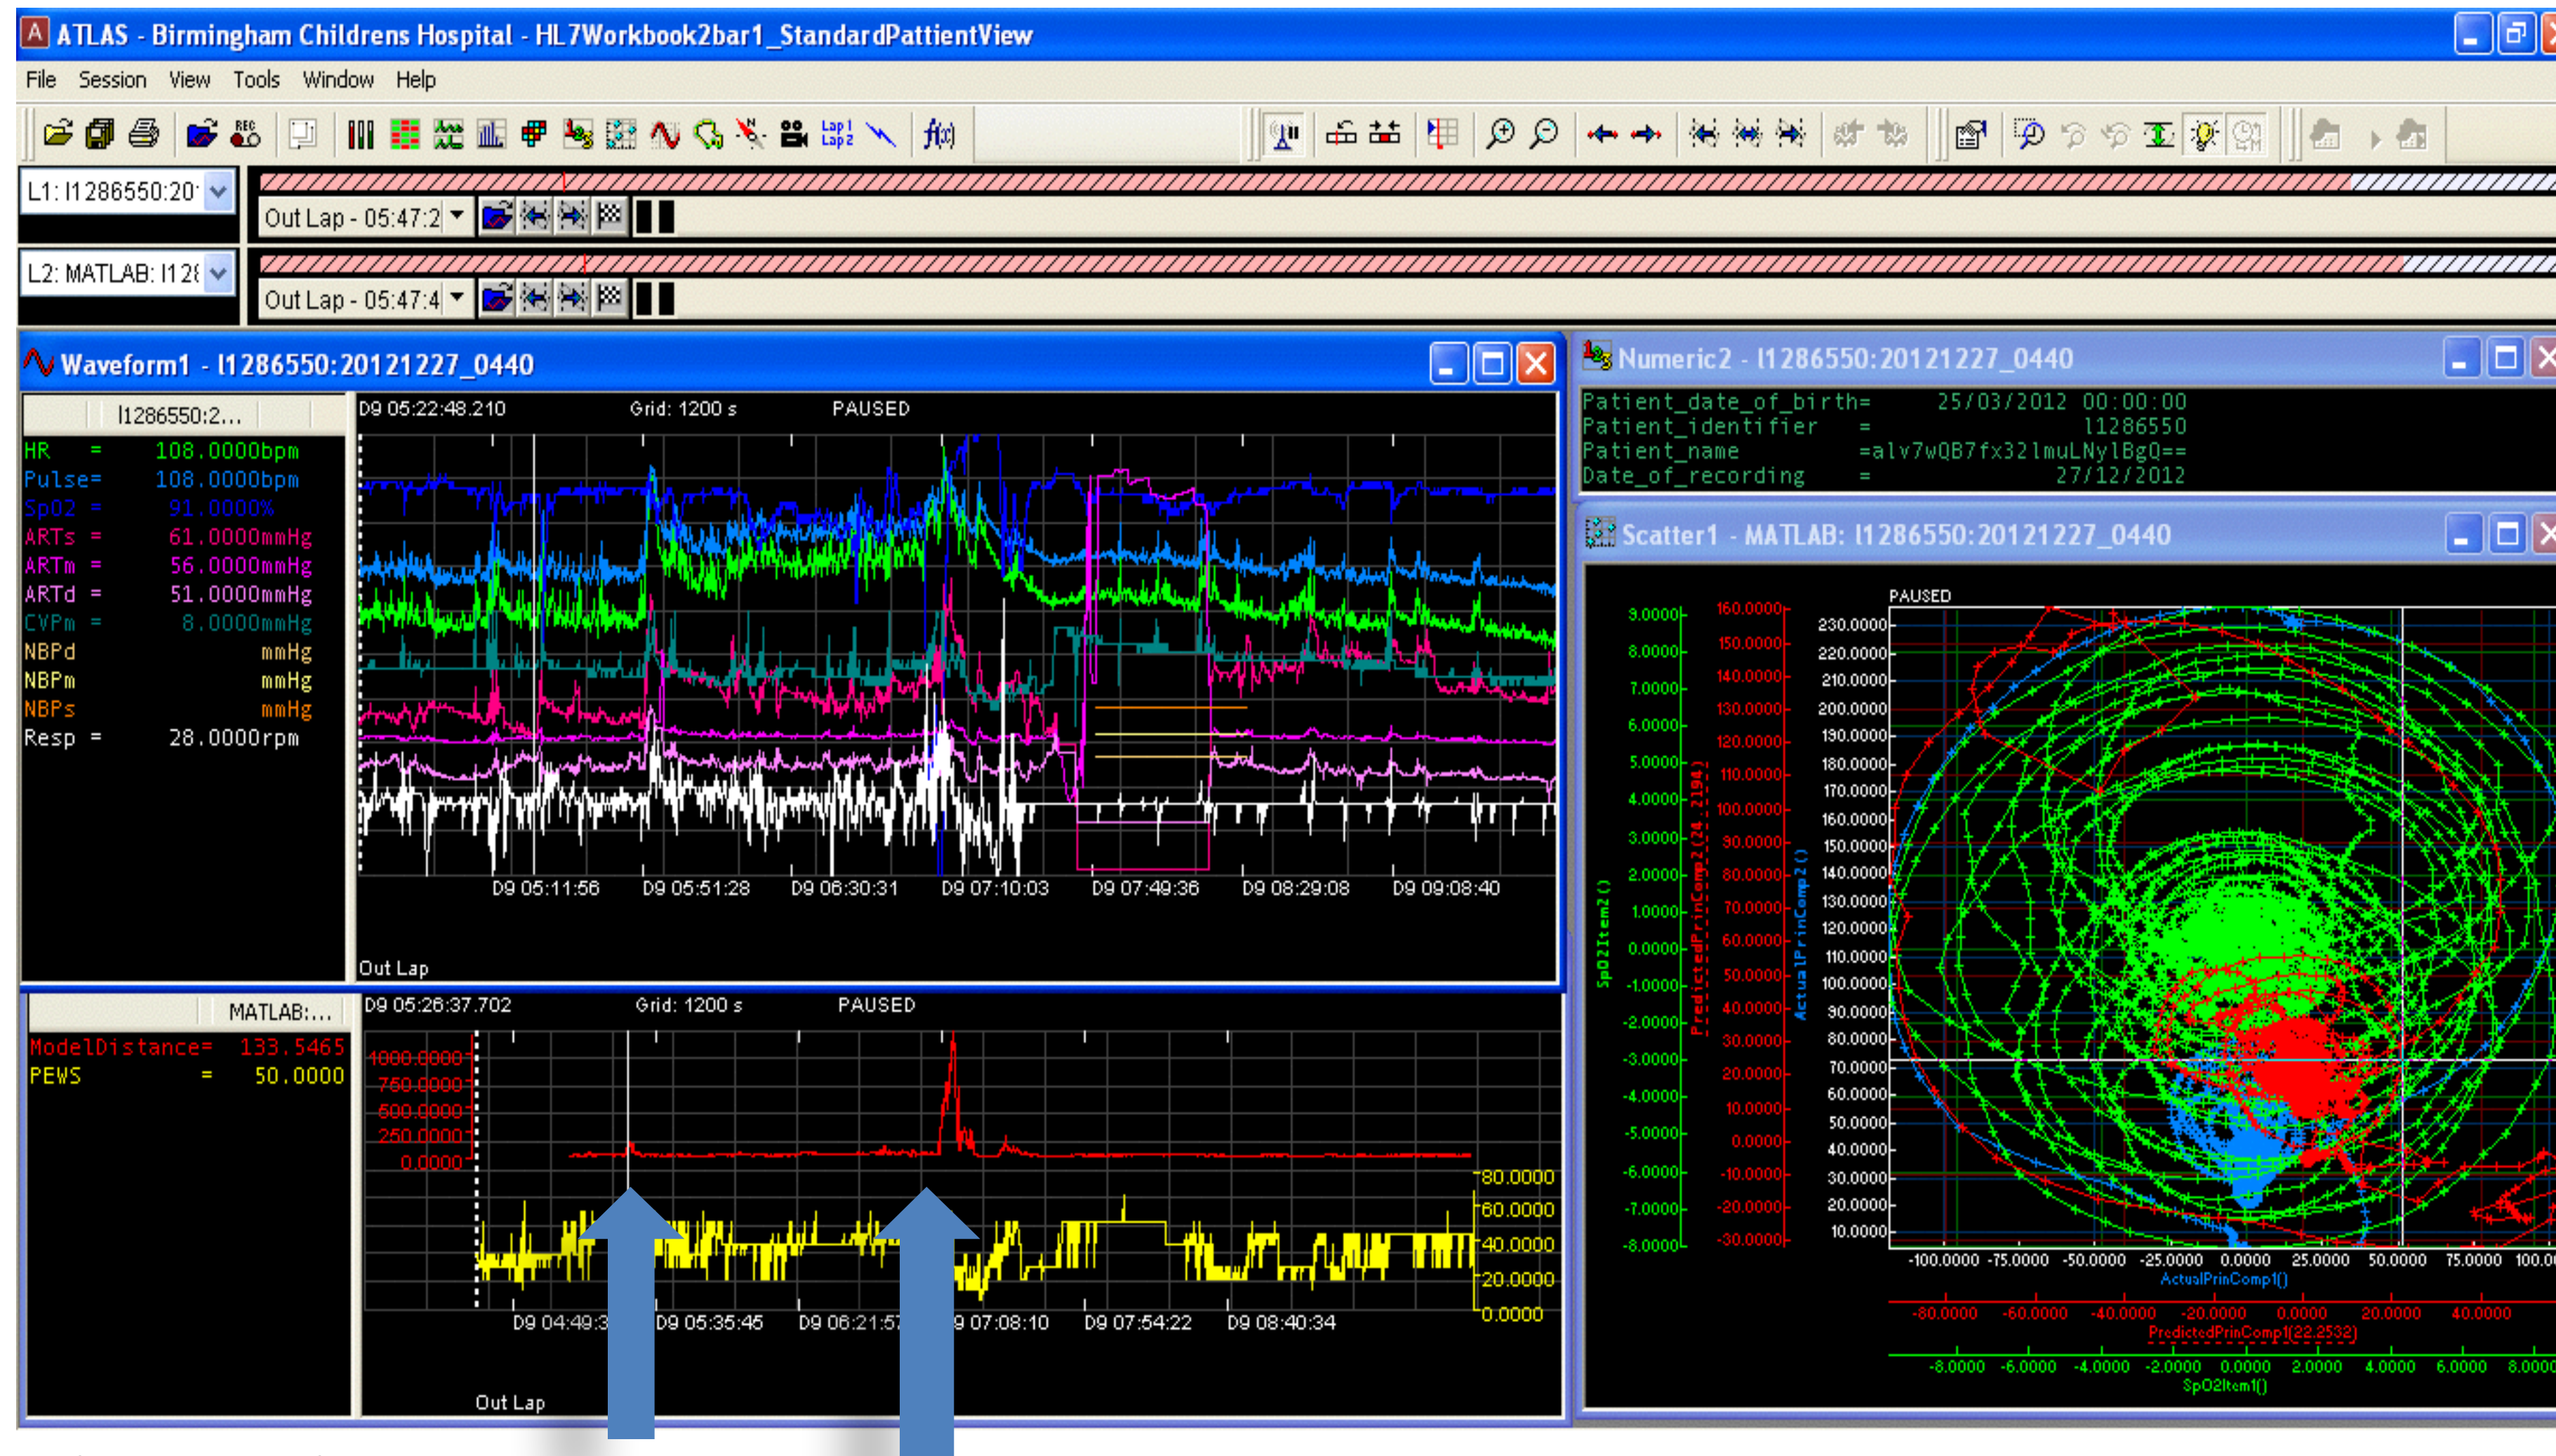

RAPID pilot
Wellcome HICF funded
41 patients recruited
Wireless monitoring possible

Redefining
predictable

T21 child with pulmonary hypertension

First warning at 5.26

Wakes up at 6.26

Unplanned extubation at 7.06

Not visible with bedside monitoring but could we predict this in future?
