Robert Rauschenberg *White Painting* (1951)

It was after I got to Boston
that I went into the
anechoic chamber at Harvard
University.
Anybody who knows me knows
this story.
I am constantly telling it.
Anyway,
in that silent room,
I heard two sounds,
one high and
one low.
Afterward I asked the engineer in
charge why, if the room
was so silent, I
had heard two sounds.
He said,
“Describe them.” I did.
He said,
“The high one
was your nervous system
in operation.
The low one was
your blood in circulation.”

Tuning Meditation (1971)

Inhale deeply;
exhale on the note of your choice;
listen to the sounds around you,
on your next breath make a note no one else is making;
repeat.
Call it listening out loud.
