Доброго вечора, ми з
УКРАЇНИ!

IT ARMY OF UKRAINE

It Army Of Ukraine is a worldwide IT community united to resist the Russian invasion to Ukraine. We are supreme power in Ukraine capable to block over 800 targets simultaneously. Vary professionals related and keep using automated systems to harass websites and internet services of the country-aggressor. This website is made to provide guidelines for joining our resistance even if you are very rookie in technologies. The Telegram chat group ([link](#)) established for quick customer support in case something is still hard to catch on.

OUR MISSION:

IT ARMY aims to help Ukraine win by crippling aggressor economies, blocking vital financial, infrastructural and government services, and tiring major taxpayers. We also stop hostile media propaganda and spread truth about the war. We want every resident of aggressor countries to feel and tire from their state's aggression.

Join the fight.

Glory to Ukraine!

Important!

To do attack as effective as possible we should be coordinated and use same targets for all community and keep attacking as long it's needed.

Time To Think
